September 1, 2018

Myanmar Oil and Gas Services Society (MOGSS) was formed on May 8, 2013 with the following main objectives:

- a. To move to the International Servicing System
- b. To create More Chances for Citizens
- c. To achieve Environmental and Cultural Friendly Services
- d. To construct Risk Free Work Sites
- e. To provide Training and Familiarization of High Tech
- f. To launch Services with High Ethics
- g. To build better Understanding

Our interest is to bring the wide Myanmar Oil and Gas Services Community including Exploration, Drilling, Production, Distribution, Engineering, EIS/SIA, Health and Safety, Measurement and Control, Manpower, Inspection, Catering, Training and other Services to a closer connection and sharing experience, discoveries and knowledge.

Based on this ground, The Myanmar Oil and Gas Services Society – MOGSS was formed with the staff from various local service companies as an initiative to establish an association driven and to promote the development of state economy and wealth through development of oil and gas sector. MOGSS also try to find out the suggestions and/or solutions for the member companies negotiating with persons concerned with a collective voice of the members.

MOGSS organized the followings for the members.

- | | |
|---|---|
| 1. Networking / Social Gathering | Approximately 2 – 4 Times / Year |
| 2. Talks related to Oil and Gas Sector | Approximately 2 – 4 Times / Year |
| 3. Conference and Exhibitions | Approximately 2 – 4 Times / Year |
| 4. CEC Meetings | Every 3-Months and Where ever necessary |
| 5. Member Meetings | Where ever necessary or when requested by member(s) |
| 6. Meeting with MOE / MOGE / MIC / etc. | Where ever necessary or when requested by member(s) |
| 7. Extraordinary General Meeting (EGM) | Where ever necessary or when requested by member(s) |
| 8. CEC Election | Every Two Years |
| 9. Annual General Meeting (AGM) | Once / Year |
| 10. Networking Golf Tournament | Occasionally |
| 11. Training | Occasionally |
| 12. News Letter | Occasionally |
| 13. Member Profile Directory | Once / Year |

Every Member can enjoy all the activities mentioned above Free of Charge / Special Rate / Special Arrangement but respective annual fee should be remunerated accordingly. Validation of Membership is based on a Calendar Year (January to December).

All type of membership applications should be submitted with 2 Passport photos and respective member fees. Fees can be transferred by Bank also.

If registered after end of June, the Registration Fee will be full but **Annual Fee** will be **halved**.

All MOGSS Members will be issued a **Member ID Card** and/or **PIN**.

As soon as registered with prescribed fees in full, the person or company will be treated as a member even though the Member Card and/or Pin are not yet issued. Every Member will be informed or invited to the events/meetings/trainings organized by MOGSS by email. It is a must to reply MOGSS Office whether member(s) will participate or not. Sometimes, MOGSS may announce the events to members and general audience thru Newspapers, Billboards and so on. Events are organized in Myanmar or sometimes in Overseas.

Message from the Chairman

Myanmar Oil and Gas Services Society (MOGSS) was formed in 2013 as an association to help upgrade standards of the Oil and Gas Services Sector in Myanmar.

As a Myanmar Oil and Gas Services Society, we wish to be a collective voice that allows us to be much stronger, as we are better able to address the issues facing our industry together. We together can protect the Oil and Gas Service Companies for achieving optimal profit and social well being. With this opportunity, we are able to share ideas, knowledge and challenges learning from each other's experience.

Our aim is to promote transparent dealings, a responsible service sector and growing capability among our society members. Our activities include encouraging industry network, developing technical resources, training talent and conducting responsible business. One of our key activities is cooperating with Universities to educate the young oil and gas professionals so they can begin to work in the Oil and Gas after graduation.

We thank and appreciate the 149 Companies and 250 members that have supported us for the growth and improvement of our society. And we wish to continue to welcome both local and international Oil and Gas Service Companies to join hands with us to value and serve the Myanmar Oil and Gas Industry with a purpose of integrity and good interest at heart.

Kyaw Kyaw Hlaing (Chairman, MOGSS)

BRIEF BIOGRAPHY OF MOGSS CHAIRMEN

U Kyaw Kyaw Hlaing (Chairman, MOGSS)

Mr. Hlaing received Master of Science from Yangon Arts and Science University. Worked for Myanma Oil and Gas Enterprise as Geophysicist from 1975 to 1981. Served for Schlumberger Technical Services as Field Engineer / Data Services Manager from 1981 to 1994 in Myanmar, India, Indonesia and United States.

Founded SMART Technical Services in 1994. Present position is Chairman for SMART Group of Companies. Actively involved in environmental works including producing a video awareness program titled " Stop Using Plastic Bag " and " Waste ". K. K. Hlaing is a weekly host for local TV Talk shows and radio channels on Capacity Building and Leadership topics. An author and public speaker of training in management tools and leadership skills. Already published 14 books. Also a frequent guest speaker at numerous Oil and Gas Conferences and Seminars.

U Pyi Wa Tun (Vice Chairman - 1, MOGSS)

Ken Tun is the Chairman and CEO of Parami Energy Group of Myanmar. The group has interest in Oil and Gas, Power, Construction and Insurance.

He received his M.B.A degree from the National University of Singapore and Bachelor of Engineering degree from Yangon Institute of Technology. Under his capacity as the Chief Executive Officer of Parami Energy Group, he initiated programs to support one third of Monastic schools in Myanmar and to plant 500,000 trees by 2015. He was honored as

Young Global Leader by World Economic Forum in 2014 Management tools and leadership skills.

Daw Hnin Phyu Phyu Aung (Vice Chairman - 2, MOGSS)

is Managing Director of Lion Energy General Services Co. Ltd. Since its inception in 2012, Lion Energy has offered a range of services to International Oil and Gas companies, Energy Services Companies and Other commercial organizations such as Commercial Chambers and Trade Councils. Lion Energy has also undertaken a number of research and consultancy projects in Myanmar energy industry including upstream and downstream sectors, gas market and power market analysis for major international energy companies.

Prior to that, she worked with Wood Mackenzie, from 2010 to 2012, and held a number of key roles in South East Asia Upstream team, overlooking Thailand, Philippines, Myanmar, China, and Indonesia markets. She deeply involved with fiscal and commercial analysis of producing assets, studies of gas sales agreements (GSA), gas transportation agreements (GTA) and also contributed to Gas & Power and Upstream Consulting regional projects.

From 2004 to 2008, Hnin worked for Schlumberger as a Senior Field Engineer (Wireline operations) mainly in China and Japan. She successfully undertook exploration projects as a lead engineer including Daqing and Jilin oilfield projects in China.

Hnin earned her Master of Business Administration (MBA) from National University of Singapore and Bachelor of Engineering (B.E.) in Electronics from Yangon Technological University.

U Aung Ye Soe (Secretary General, MOGSS)

U Aung Ye Soe, the founder and Managing Director of Machinery and Solutions Company Limited and M&S Group of Companies with diversify interests in Oil and Gas, Power, Infrastructure and Telecommunication Industry. He received Master of Engineering from University of Maryland, College Park and his earlier career includes Oil and Gas Industry, International Trading and Telecommunication Industry. He's also currently served as Secretary General of Myanmar Oil and Gas Services Society (MOGSS).

AFFINITY TEST SERVICES PTE LTD is a group company and one of the Leading Service providers in Myanmar, Singapore and Malaysia. AFFINITY was founded by Mr. KHOO KOK LEONG, who has more than 40 years experience in NDT & Heat Treatment Services.

Affinity Quality Test Services provides a full range of conventional and advanced Non Destructive Testing services to the Oil and Petrochemical, Refinery, Marine, Construction, Power Generation plant and Aerospace industries. Our management and staff have extensive experience in NDT, Heat Treatment and API Inspection. We are carrying out the above services in Engineering fabrication, operating plants and offshore facilities.

With a suite of independent inspection qualifications conforming to ASNT and/ or ISO 9712, our staff are fully qualified and trained in all major NDT methods.

We also provide industrial Rope Access solutions which offer significant time and money savings over scaffolding, by enabling minimal disruption to workflow and faster testing.

Our business has been built on bedrock of vast experience, strong technical expertise and practical knowledge.

Global Offshore Consultants (GOC) was registered at end of 2014 as an independent private company with Singapore as Head Office and has established affiliated offices in Malaysia, Vietnam, Indonesia and fast-growing Myanmar in 2015. Our organic growth will include offices in Thailand and Middle East by 2018.

All our technical and marine staffs are highly qualified and recognized in the marine, offshore and onshore industries with most of them having worked for more than 10 years in this region. Our technical capabilities include engineering design and verification as third party to ensure a safe and reliable completion for onshore and offshore development. We are also well versed in Port development, Facilities audit, Risk management and QHSE facilitation. Our marine capabilities include various vessel inspections, OVID, DP assurance and marine operations as rig-mover, tow master, marine advisor and location move approval.

China Oilfield Services Limited (COSL) is an integrated oilfield service solution provider with nearly 50 years of experience in offshore operation. COSL listed in both Shanghai and the HK Stock Exchange (601808.SS/2883.HK). With its four major business segments of geophysical services, drilling services, well services and marine & transportation services covering the exploration, development and production phases of oil and gas industry, COSL is an all-round offshore oilfield service company with integrated functions and bundled service chain in China and even in the world.

COSL possesses the largest fleet of offshore oilfield services facilities in Asia. To the end of 2014, COSL operated 42 drilling rigs of which 31 are jack-up drilling rigs and 11 are semi-submersible drilling rigs, 2 accommodation rigs and 5 module rigs. In addition, COSL also owns and operates the largest and most diverse fleets in offshore China, including 69 working vessels and 3 oil tankers, 4 chemical carriers, 8 seismic vessels, 2 OBC teams, 7 surveying vessels, and a vast array of modern facilities and equipment for logging, drilling fluids, directional drilling, cementing and well work-over services, including FCT (Formation Characteristic Tool), FET (Formation Evaluation Tool), LWD (Logging-While-Drilling) and ERSC (ELIS Rotary Sidewall Coring Tool), etc.

COSL employees always adhere to the international QHSE standards and commit themselves to providing first-class services for customers. COSL has obtained the International Safety Management (ISM) certifications, and the QHSE Management System certificates issued by DNV in compliance with ISO9001, ISO14001 and OHSAS18001 standards.

With the concept "ALWAYS DO BETTER", COSL will endeavor to provide safe, high-quality, high-efficiency, and valued services for domestic and international customers to realize win-win with shareholders, customers, employees and partners and head towards being one of the world's top-notch oilfield service companies.

: +959 5030844 soe@parami.biz

Parami Energy was founded in 2004 and has been originally grown from an engineering service provider to the Parami Energy Group of Companies with core businesses in Oil & Gas and Power.

Parami Energy also imports and distributes liquefied petroleum gas (LPG) within Myanmar, providing safe and reliable energy at affordable prices to rural and urban communities.

Parami Energy is active in building much-needed power generation and distribution facilities in Myanmar. For instance, mini-grids bring electrification to underserved or isolated urban and rural communities. An important by-product of Parami's approach to rural power needs is to reduce the devastating effects of deforestation.

Adopting international standards and sustainable best practices is what we are aiming for as we are committed to being a responsible corporate citizen and to improving the lives of the people and communities where we operate.

 : +65 90269127 honey.oo@shunzhougroup.com

- Shun Zhou, from its humble beginnings in 1988, transformed into a Total Solution Centre, supplying materials for the construction and maintenance of ships and oil rigs. Group Managing Director Albert Oon attributes it's success today to their Core Values. The first being his team of 40 dedicated staff.
- Shun Zhou depended on the team embracing growth through continual Innovation into Robotics, an AI-based intelligent quotation system and an RFID based Enterprise Resource Planning system. The company expanded it's warehouse into a multi-storey complex, three times its former size, catering to a larger range and volume of inventory, newer machinery and the robotics fabrication facility to produce its own products.
- Along with its people and infrastructure, Shun Zhou is also about a Customer First ethos, with the goal of delivering an extraordinary level of service. This professionalism is what customers and partners wanted. That ethos is 'We Put Your Interest Above Ours'.
- And Shun Zhou emphasised on excellence in quality. "Anything that goes out of my warehouse has to look as good as brand new. Our products represent our company. Our branding. And in the end, the customer will feel that buying from us is worthwhile.
- And to that end, the company has been giving back to society, through the Shun Zhou Foundation, a non-profit organisation to benefit the poor and old as a form of social Sustainability. To inspire the next generation, which Albert believes is the path to happiness.

ayemintun@uniclimb.com

Uniclimb Services (Myanmar) Co., Ltd. is a subsidiary of Uniclimb Services Pte Ltd (Singapore) which actively engage in providing integrated services with access solutions in Marine offshore, oil & gas, civil construction and structural maintenance industries.

Our workforce and collective strength is the key ingredient to the continued growth of our company, and enables us to serve diverse clients ranging from local leading shipyards to global offshore groups, in Myanmar and Singapore as well as around the world.

Through our dedication to quality work, Uniclimb is honoured to have achieved industry recognition such as API, LEEA, ABS, ASNT and DROPS.

Through the experience, professionalism and flexibility in our provision of services, we offer safe quality work and timely services to our clients.

Uniclimb offers an array of engineering support services to the marine, oil & gas and oil refinery industries through our use of the Industrial rope access method. On top of being certified rope access technicians under (IRATA) and engineers, our team is also adept in welding, electrical systems, high-pressure coating removal and application, as well as mechanical and rigging capabilities.

Why Choose Uniclimb Services?

Minimize disruption to ongoing operations We use the least amount of equipment and manpower to attain your access objectives Generate significant cost and time savings Eliminate the need for time consuming PE approval design for specialized scaffolding and other standard forms of access methods Single contact point You experience minimum hassle by communicating and receiving reports from a single contact point who manages the team of rope access technicians Safety through quality and personal responsibility

We take the safety of our team and our workers very seriously. That's why we believe in using only reputable, quality products and instilling in each of our team members a sense of personal obligation and ownership, not just for their assigned tasks but for the environment they are working in.

"Uniclimb Services strives to arrange, provide and maintain a safe work system for all our employees and contractors, while continuously improving our performance in terms of excellent quality, prompt service, and competitive prices."

- We provide the required reliable supplies and equipments your company needs with reasonable prices within the agreed time.

BRIEF HISTORICAL BACKGROUND OF MYANMAR OIL AND GAS

The country now known as Myanmar, sandwiched in between China and India, two of the world's biggest sources of energy demand, was one of the world's first oil producers, with some exports as early as 1853. Foreign investment followed, with sizable fields developed in the late 1800s and early 1900s. Myanmar is believed to have significant untapped reserves of natural gas and Myanmar is the largest gas exporter in Southeast Asia.

Between 1886 and 1962, the country's oil industry was dominated by Burmah Oil Company (BOC), which discovered the **Yenangyaung** oil field in 1887 and the **Chauk** oil field in 1902. Both are still in production.

In 1962, the oil and gas industry was nationalized. Until the late 1980s, the government kept foreign operators away. From 1962 to 1988, oil exploration and production were mainly performed by MOGE; foreign operators were kept out by a strict nationalistic policy and the lack of an appropriate legal framework. But beginning in 1988, it liberalized the oil and gas sector to begin allowing outside investment again. Western companies including Total S.A. and Unocal Corporation, later bought by Chevron, entered the market. As in many other countries, the State assumed ownership of the resources, either operating them itself or delegating this task to private operators, who were paid for their outlay and work in oil or gas under Production Sharing Contracts (PSCs).

After a few years, a host of investors from Asia and else where expanded their operations, including CNOOC Ltd. of China and South Korea's Daewoo International. The process intensified after 2004, as Myanmar authorities accelerated the opening of areas for exploration. By 2007, at least 27 companies from 13 countries, including Petronas of Malaysia, PTTEP of Thailand, Total E&P of France and ONGC of India, were active in Myanmar's Oil and Gas Industry.

Although major discoveries of oil have been limited, companies have found sizable deposits of natural gas, which now makes up the bulk of Myanmar's production. Foreign companies are particularly interested in offshore areas along Myanmar's western coast in the Bay of Bengal, where a consortium including Daewoo has developed a major gas asset that will include a pipeline to China.

The key player of oil and gas policy in Myanmar is the Ministry of Energy (MOE), which has oversight for three state-owned enterprises:

- Myanmar Oil and Gas Enterprise (MOGE), formed in 1963, is responsible for oil and gas exploration and production, as well as domestic gas transmission through a 1,200-mile onshore pipeline network.
- Myanmar Petrochemical Enterprise (MPE) operates three small refineries, three fertilizer plants and a number of other processing plants.
- Myanmar Petroleum Products Enterprise (MPPE) is responsible for retail and wholesale distribution of petroleum products.

In 2016, the ministry was reformed as **Ministry of Electricity and Energy - MOEE**

(လျှပ်စစ်နှင့်စွမ်းအင်ဝန်ကြီးဌာန) by the new government.

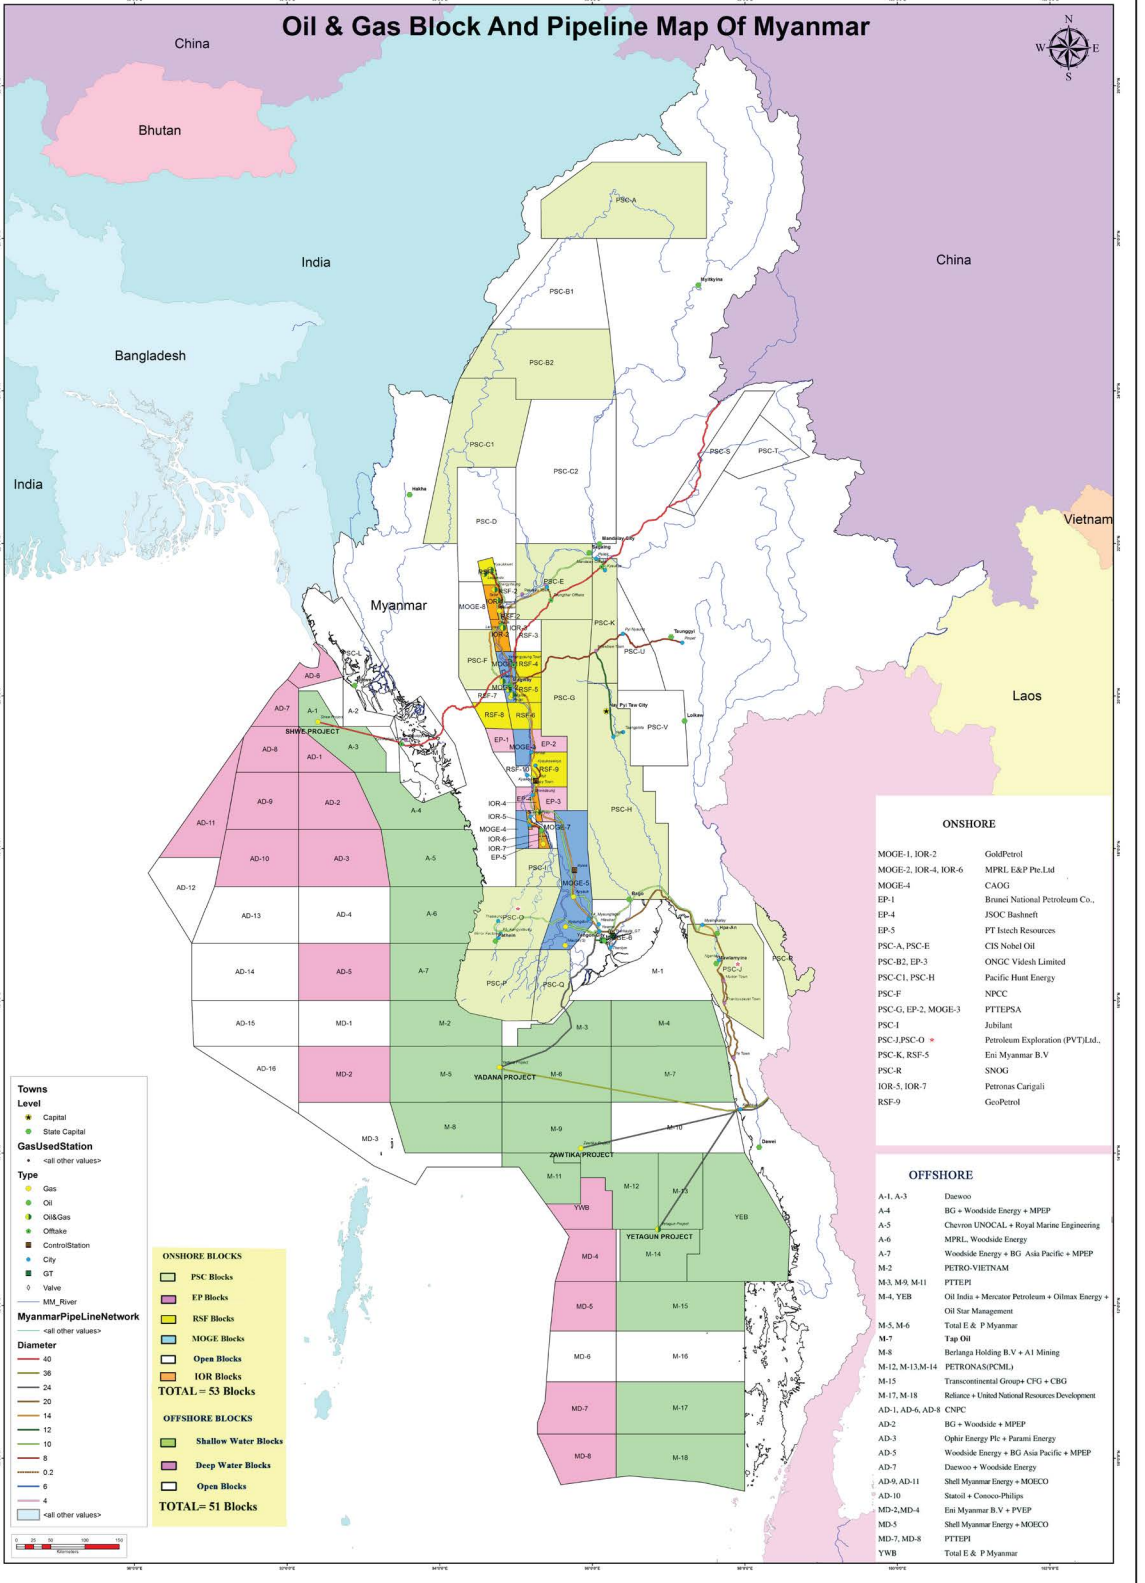

In 2007, nine foreign oil companies were permitted in 16 onshore blocks to explore new areas, to enhance recovery from existing fields, to reactivate fields where production had been suspended and to produce oil and gas.

In the offshore, majors companies including Shell, ENI, ConocoPhillips, Statoil, Ophir, BG, Chevron, Total, Oil India and Woodside are exploring and/or developing in 31 blocks since 2014.

Since late 2004, Myanmar's authorities have intensified the opening of blocks to foreign companies. Myanmar's oil output is small, with gas taking over. The country produces around 180, 000 barrels of oil equivalent per day, of which 90% is gas.

Oil & Gas Block And Pipeline Map Of Myanmar

The background is a solid orange color with a repeating geometric pattern of diamond shapes and floral motifs in a slightly darker shade of orange. A large, white, rounded rectangle frame is centered on the page, with its top and bottom edges slightly offset from the center. The text "MOGSS ACTIVITY PHOTOS" is centered within this frame.
