

MOGSS MEMBER COMPANY BRIEF PROFILESS

MYANMAR OIL AND GAS SERVICES SOCIETY (MOGSS)

Web Site: www.mogss.org

E-mail: mogss.mm@gmail.com

Office Tel: +959 250919154

31-July-2017

Myanmar Oil and Gas Services Society (**MOGSS**) was formed on May 8, 2013 with the following main objectives:

- a. To move to the International Servicing System
- b. To create More Chances for Citizens
- c. To achieve Environmental and Cultural Friendly Services
- d. To construct Risk Free Work Sites
- e. To provide Training and Familiarization of High Tech
- f. To launch Services with High Ethics
- g. To build better Understanding

Our interest is to bring the wide Myanmar Oil and Gas Services Community including Exploration, Drilling, Production, Distribution, Engineering, EIS/SIA, Health and Safety, Measurement and Control, Manpower, Inspection, Catering, Training and other Services to a closer connection and sharing experience, discoveries and knowledge.

Based on this ground, The Myanmar Oil and Gas Services Society – MOGSS was formed with the staff from various local service companies as an initiative to establish an association driven and to promote the development of state economy and wealth through development of oil and gas sector. MOGSS also try to find out the suggestions and/or solutions for the member companies negotiating with persons concerned with a collective voice of the members.

MOGSS organized the followings for the members.

- | | |
|---|---|
| 1. Networking / Social Gathering | Approximately 2 – 4 Times / Year |
| 2. Talks related to Oil and Gas Sector | Approximately 2 – 4 Times / Year |
| 3. Conference and Exhibitions | Approximately 2 – 4 Times / Year |
| 4. CEC Meetings | Every 3-Months and Where ever necessary |
| 5. Member Meetings | Where ever necessary or when requested by member(s) |
| 6. Meeting with MOE / MOGE / MIC / etc. | Where ever necessary or when requested by member(s) |
| 7. Extraordinary General Meeting (EGM) | Where ever necessary or when requested by member(s) |
| 8. CEC Election | Every Two Years |
| 9. Annual General Meeting (AGM) | Once / Year |
| 10. Networking Golf Tournament | Once or more / Year |
| 11. Training | Occasionally |
| 12. News Letter | Occasionally |
| 13. Member Profile Directory | Once / Year |

Every Member can enjoy all the activities mentioned above Free of Charge / Special Rate / Special Arrangement but respective annual fee should be remunerated accordingly. Validation of Membership is based on a Calendar Year. All type of membership applications should be submitted with 2 Passport photos and respective member fees. Fees can be transferred by Bank also. If registered after end of June, the Registration Fee will be full but Annual Fee will be halved. All MOGSS Members will be issued a **Member ID Card** and/or **PIN**. As soon as registered with relevant fees in full, the person or company will be treated as a member even though the Member Card, Certificate and Pin are not yet issued. Every Member will be informed / invited to the events/ meetings/ trainings organized by MOGSS by email. It is a must to reply MOGSS Office whether member(s) will participate or not. Sometimes, MOGSS announced the events to members and general audience thru Newspapers, Billboards and so on. Events are organized in Myanmar or sometimes in Overseas.

Message from the Chairman

Myanmar Oil and Gas Services Society (MOGSS) was formed in 2013 as an association to help upgrade standards of the Oil and Gas Services Sector in Myanmar.

As a Myanmar Oil and Gas Services Society, we wish to be a collective voice that allows us to be much stronger, as we are better able to address the issues facing our industry together. We together can protect the Oil and Gas Service Companies for achieving optimal profit and social well being. With this opportunity, we are able to share ideas, knowledge and challenges learning from each other's experience.

Our aim is to promote transparent dealings, a responsible service sector and growing capability among our society members. Our activities include encouraging industry network, developing technical resources, training talent and conducting responsible business. One of our key activities is cooperating with Universities to educate the young oil and gas professionals so they can begin to work in the Oil and Gas after graduation.

We thank and appreciate the 93 Companies and 167 members that have supported us for the growth and improvement of our society. And we wish to continue to welcome both local and international Oil and Gas Service Companies to join hands with us to value and serve the Myanmar Oil and Gas Industry with a purpose of integrity and good interest at heart.

Kyaw Kyaw Hlaing (Chairman, MOGSS)

BRIEF BIOGRAPHY OF MOGSS CHAIRMEN

U Kyaw Kyaw Hlaing (Chairman, MOGSS)

Mr. Hlaing received Master of Science from Yangon Arts and Science University. Worked for Myanma Oil and Gas Enterprise as Geophysicist from 1975 to 1981. Served for Schlumberger Technical Services as Field Engineer / Data Services Manager from 1981 to 1994 in Myanmar, India, Indonesia and United States.

Founded SMART Technical Services in 1994. Present position is Chairman for SMART Group of Companies. Actively involved in environmental works including producing a video awareness program titled " Stop Using Plastic Bag " and " Waste ". K. K. Hlaing is a weekly host for local TV Talk shows and radio channels on Capacity Building and Leadership topics. An author and public speaker of training in management tools and leadership skills. Already published 14 books. Also a frequent guest speaker at numerous Oil and Gas Conferences and Seminars.

U Pyi Wa Tun (Vice Chairman (1) MOGSS)

Ken Tun is the Chairman and CEO of Parami Energy Group of Myanmar. The group has interest in Oil and Gas, Power, Construction and Insurance.

He received his M.B.A degree from the National University of Singapore and Bachelor of Engineering degree from Yangon Institute of Technology. Under his capacity as the Chief Executive Officer of Parami Energy Group, he initiated programs to support one third of

Monastic schools in Myanmar and to plant 500,000 trees by 2015. He was honored as Young Global Leader by World Economic Forum in 2014 Management tools and leadership skills.

Daw Hnin Phyu Phyu Aung (Vice Chairman (2) MOGSS)

is Managing Director of Lion Energy General Services Co. Ltd. Since its inception in 2012, Lion Energy has offered a range of services to International Oil and Gas companies, Energy Services Companies and Other commercial organizations such as Commercial Chambers and Trade Councils. Lion Energy has also undertaken a number of research and consultancy projects in Myanmar energy industry including upstream and downstream

sectors, gas market and power market analysis for major international energy companies.

Prior to that, she worked with Wood Mackenzie, from 2010 to 2012, and held a number of key roles in South East Asia Upstream team, overlooking Thailand, Philippines, Myanmar, China, and Indonesia markets. She deeply involved with fiscal and commercial analysis of producing assets, studies of gas sales agreements (GSA), gas transportation agreements (GTA) and also contributed to Gas & Power and Upstream Consulting regional projects.

From 2004 to 2008, Hnin worked for Schlumberger as a Senior Field Engineer (Wireline operations) mainly in China and Japan. She successfully undertook exploration projects as a lead engineer including Daqing and Jilin oilfield projects in China.

Hnin earned her Master of Business Administration (MBA) from National University of Singapore and Bachelor of Engineering (B.E.) in Electronics from Yangon Technological University.

U Aung Ye Soe (Secretary General, MOGSS)

U Aung Ye Soe, the founder and Managing Director of Machinery and Solutions Company Limited and M&S Group of Companies with diversify interests in Oil and Gas, Power, Infrastructure and Telecommunication Industry. He received Master of Engineering from University of Maryland, College Park and his earlier career includes Oil and Gas Industry, International Trading and Telecommunication Industry. He's also currently served as Secretary General of Myanmar Oil and Gas Services Society (MOGSS).

The background is a vibrant blue gradient, transitioning from a darker blue at the top to a lighter, almost white glow at the bottom right. It is overlaid with a complex pattern of semi-transparent, overlapping circles and rectangular shapes, creating a sense of depth and movement. The circles vary in size and opacity, some appearing as soft halos while others are more defined. The rectangular shapes are also semi-transparent and are arranged in a way that suggests perspective, as if they are floating or moving through space. The overall effect is a modern, digital, and abstract aesthetic.

Energize Myanmar was established in 2012 to assist in the development of Myanmar, with a focus on electricity generation. Our founders collectively have over 30 years' social and economic development experience in the UK and Europe, and Energize Myanmar is dedicated to assisting as much as possible in the generation of critically-lacking electricity across commercial and residential sectors.

Alongside a team comprising diverse international and local specialists within Engineering, Finance, and Infrastructure development, Energize Myanmar structures projects to accelerate the progress of power station growth sustainably and efficiently. As a company, our expertise ranges across sectors and disciplines, enabling us to provide agile and flexible partnerships to international companies.

Our vision is to contribute as much power as possible to Myanmar, leveraging our relationships with best-in-class international partners and the strong relationships we enjoy on the ground to solve Myanmar's energy gap. We are committed to this vision for the long-term, and to becoming the leading private sector energy supplier and Independent Power Producer, driving investment in low-carbon power generation.

Founded in 2013, HQS has started to provide services in two main areas – IS/IT and General Services for expatriates. Based on the founder’s long-time and vast experience in IT & Telecoms field at Oil & Gas sector, HQS is confident that we can perform very well in this area and occupy some market portion in this service sector with a prospective oversea partnership. We stretch out our IS/IT support business with the founder’s core expertise and technical strength of our certified IT specialists by cooperation with the foreign partners for further business expansion. As name – HQS “High Quality Service” follows, we focus on delivering quality services to our esteemed customers. Our international clients are Total E&P Myanmar and Daewoo International E&P Myanmar.

Nevertheless, we are the specialist in providing services in the following areas – mobility and relocation, visa and immigration, recruitment and human resources support, procurement and logistics services for foreign and local companies. We are in partnership with METRICA Inc., from U.S.A to provide varieties of general services in Myanmar. Our client is currently the US department of the treasury. We are also focusing this business for further expansion to be able to provide such services to the increasing foreign companies in Myanmar.

In 3 years' time, Mudrock Media Sdn Bhd established a global wide sharing media and business platform for the Oil and Gas, Marine and Offshore, Engineering, Event & Training and associated Industries.

Mudrock Media expertise on cartographic services and media supports as well as business matching or connections. Mudrock Media has published a series of Map of Oil & Gas Activities for regions and countries include Southeast Asia, Middle East, Australasia, Asia-Pacific, South Asia, Malaysia, and Myanmar that are highly demanded in the industry.

MUDROCK APPS, a handy devise application that developed in 2016 to enhance the traditional mapping solution and allowing the map user to download full information of the map from the restriction of limited print size at any place any time when they need it, but not rely on neither online server nor website applications.

Mudrock Media is also Channel Partner with Linnter to develop and market the Geophysical Data to support the exploration and production activities.

Mudrock Media is connecting B2B meeting within our valuable business network for special Oil & Gas Trading.

- DHL is the leading global brand in the logistics industry. In the Express division, we transport urgent documents and goods reliably and on time from door to door. Our global network spans more than 220 countries and territories, in which some 90,000 employees provide services to more than 2.5 million customers.
- Myanmar DHL Ltd. was established over 35 years ago and is the pioneer of International Air Express Industry in Myanmar, connecting businesses of all sizes in the country with the world through an unparalleled global network.
- Today, we have over 70 Certified International Specialists in Myanmar serving over 2,500 customers' logistics needs, supported by 7 service facilities, 1 gateway facility located at Yangon International Airport, over 30 vehicles for pickup and delivery, and more than 24 flights per week connecting shipments in and out of Myanmar.
- As the market leader in Time Definite Industry with over 70% market share* in Myanmar, DHL Express continues to invest in the emerging market to capture the exponential growth momentum.
- In 2015, with an investment of Euro 8.6 million, we opened a world-class facility housing the Country Office and a Service Center that can handle up to 1,000 shipments per day at a total operational floor area of 1,380 square meters.
- Benefiting from the state-of-the-art technology, customers' shipments go faster and safer to the world. Operational efficiency has leveled up as shipments speed through our facility on the motor-driven conveyor belt system and automatic weighing scale. Security is reassured with x-ray machines installed for screening shipments and 24/7 CCTV monitoring in the facility, giving customers extra peace of mind.
- In 2016, DHL Express has opened the largest express facility in Myanmar which is designed to handle massive shipment volumes expected over the next decade – to the year 2025 and beyond.

* Market share assumption. Based on TDI volumes as estimated by DHL Express.

In 1993, our chairman, Mr. Ben Phee, became the first foreigner to start the container trade in Myanmar. Soon after, Phee Group went on to represent the national feeder carrier - Myanmar Five Star Line and other carrier lines, such as APL, NYK, ZIM, and Samudera.

OV Logistics was established in 1997 with its first offices in Singapore and Myanmar. It is a subsidiary of Phee Group of Companies which is known as the pioneer of Shipping & Logistics Industry in Myanmar. Today, it has expanded its footprint to include Cambodia, Vietnam and Thailand.

With more than 23 years of experiences and deep understanding of local regulation and practices, we are well positioned to offer end to end supply chain solution to our customers. We provide global logistics operation with a network of more than 100 strategic partner agents worldwide. We constantly rely on our extensive network and industry expertise to develop unique solution for our customers.

Loyal, passionate, inspiring, energetic, resourceful, accountable, adaptable, and resilient spirit. These are the attributes of OV Logistics' professional employees. We believe that the success of our group is attributed to staff training and upgrading program. On average, we invest at least 65 man-hours a year in training and people development.

In all, OV Logistics leverages on its expertise in International Freight Forwarding, Customs brokerage, Warehousing, Distribution, Project Management and others services to meet our customer's needs. We are now providing industry focus services to Fashion & Garment, Food & Beverage, Technologies, FMCG, Consumer & Retail, Automotive & Spares, Agricultural and Special Project.

T&E International Company Limited (T & E) has been established since 1993 as a 100% Myanmar owned company and has steadily expanded its activities, especially in the Oil & Gas field in Myanmar. T&E is a consultant management system (CMS) member of Asian Development Bank started from 2013. CMS Registration number is 014525. Those activities encompass:

Manpower (Total E&P & Other International Company)

Consulting and Other Services for International Group (providing logistical & administration support for several industrial projects involving foreign investors)

Logistics (Visa, Stay Permit, Logistical Support, Accommodation, Short Term Office Provision, Legal/Accounting Assistant for company registration)

Security (Oil & Gas Company, Hotels and Commercial Services)

Environmental services (TOTAL, PETRONAS (Incinerator Provided))

Facility Maintenance Services (Power Generation & Distribution, Fire Fighting System, HVAC, Electrical System, Generator, AVR, Water & Waste Water Treatment Service & Building Maintenance Services) (TOTAL E&P)

Maintenance for Hotels (T&E provides technical advice, design, installation, repair and maintenance with technical support from Allied Metals Co., Ltd.)

Catering services (TOTAL E&P, PCML, Myanmar Ivanhoe, Tide Water)

Water Production, Water Distribution, Water Treatment

Engineering, Procurement, Construction, Integration & Commissioning (EPCIC) and Operation & Maintenance (O &M), specialising in the following areas;

1. Oil & Gas ;
FSO, FPSO (Floating Production Storage & Offloading Vessel)
FLNG, FSRU, FSU, FSRP (Floating LNG Storage Regasification & Power Generation Unit)
Petrochemical Process Plants & Modules
Upstream & Downstream pipelines
2. Energy Sector
Power Generation, Transmission & Distribution
Solar & Renewable Energy
Waste to Energy
3. Marine
Construction, Refurbishment and Conversion of vessels & barges
4. Infrastructure & Utilities
Water Treatment & Desalination Plant
Waste Water & Industrial Waste Treatment Plant

Tuff Offshore Engineering Services Pte Ltd is an Asian grown international EPCIC and O&M company that specialises in Oil & Gas, Marine, Energy, Infrastructure and Utility solutions. Among our deliverables are Petrochemical Plants & Modules, Floating Oil & Gas Production Units/Vessels, Floating LNG Supply Chain Units/Vessels, Floating Energy Units/Vessels & on shore plants.

Our team has cumulative decades of experience in executing oil and gas projects in various countries such as North Sea, Asia-Pacific, MENA, South America and Caribbean Regions. We have a dedicated Engineering & Technical Team in Singapore, Myanmar, Australia, India and the Middle East that consists of specialists in various disciplines of engineering and complemented by an effective team of commercial experts. We deliver both EPC turnkey or on Built, Operate & Transfer (BOT) based solutions. Our Myanmar subsidiary, Tuff Energy & Engineering Myanmar Ltd is established and operating since early 2017 and currently we have a local team supporting our services in Myanmar from our main office in Yangon. As a local company we aspire to operate in a manner that our local presence shall benefit and contribute to the local businesses and the local community in general.

THONG YONG MARINE GROUP

Services – Chartering of:

Self-Propelled Jack-ups / Liftboats
Self-Propelled Accommodation Jack-up Barges
Shoalbusters and Multicats
AHTs, Tugs and Barges
Shipbuilding Consultancy and Ship Financing

Address : 1 Soon Lee Street #02-28

About the Thong Yong Marine Group

Thong Yong Marine Group began operating in 1981. Our vessels support operations in:
Offshore Oil and Gas
Offshore Wind Farm
Dredging Support

We currently have a fleet of Liftboats / Self-Propelled Jack-up Barges with main specifications:

Maximum water depth: 70m
Variable load: 1,600 tons
Main deck area: 1,300m²
Total POB: 250 pax
Main heavy lift crane: 300mt @ 15m

Our customers include: Dredging International/MEDCO, Van Oord, National Marine Dredging Company, Atlantic Maritime Group, Boskalis, Daewoo, Pertamina, Petronas, and CNOOC SES Indonesia. All our vessels meet the stringent oilfield requirements and crew members adhere to strict ISM and HSE regulations.

Uniclimb Services (Myanmar) Co., Ltd. is a subsidiary of Uniclimb Services Pte Ltd (Singapore) which actively engage in providing integrated services with access solutions in Marine offshore, oil & gas, civil construction and structural maintenance industries.

Our workforce and collective strength is the key ingredient to the continued growth of our company, and enables us to serve diverse clients ranging from local leading shipyards to global offshore groups, in Myanmar and Singapore as well as around the world.

Through our dedication to quality work, Uniclimb is honoured to have achieved industry recognition such as API, LEEA, ABS, ASNT and DROPS.

Through the experience, professionalism and flexibility in our provision of services, we offer safe quality work and timely services to our clients.

Uniclimb offers an array of engineering support services to the marine, oil & gas and oil refinery industries through our use of the Industrial rope access method. On top of being certified rope access technicians under (IRATA) and engineers, our team is also adept in welding, electrical systems, high-pressure coating removal and application, as well as mechanical and rigging capabilities.

Why Choose Uniclimb Services?

Minimize disruption to ongoing operations

We use the least amount of equipment and manpower to attain your access objectives

Generate significant cost and time savings

Eliminate the need for time consuming PE approval design for specialized scaffolding and other standard forms of access methods

Single contact point

You experience minimum hassle by communicating and receiving reports from a single contact point who manages the team of rope access technicians

Safety through quality and personal responsibility

We take the safety of our team and our workers very seriously. That's why we believe in using only reputable, quality products and instilling in each of our team members a sense of personal obligation and ownership, not just for their assigned tasks but for the environment they are working in.

"Uniclimb Services strives to arrange, provide and maintain a safe work system for all our employees and contractors, while continuously improving our performance in terms of excellent quality, prompt service, and competitive prices."

- Viking SeaTech has over 25 years of experience in the design and installation of mooring systems to the global offshore industry, using expertise honed in the world's most challenging environments.
- We can provide everything you'll ever need for your mooring / positioning requirements from once centralised source, driving cost-saving innovations to your project. Our capabilities span all mooring system types and water depths. We can undertake mooring feasibility studies, mooring concept selection work and project management. In addition, working in tandem with Viking SeaTech's well-resourced logistics department and project teams, we can deliver detailed engineering design of mooring systems to help you improve safety and ultimately save you money.
- The Viking SeaTech portfolio of mooring design experience is vast. From pre-lay to conventional catenary systems, taut systems to permanent FSO/ FPSO installations, Jack-up positioning, to offloading and quay mooring systems, we have the experience and the expertise to deliver whatever the scale of your project. Our marine supervisors can also join you on location, anywhere in the world, to lead and oversee operations, ensuring every project is completed safely, on time and to budget.
- Viking SeaTech conducts all our business activities in a manner which complies with the laws and regulations of the countries in which we operate and to internationally recognized standards; protecting people, property and the environment.

WARTSILA SINGAPORE PTE. LTD.

Equipment supply and services for Marine and O&G segment

1. Engine and Generating Sets
2. Propulsors & Gears
3. Gas Solutions
4. Pumps, Valves, Seals, Bearings, Stern Tubes
5. Ship Design

Wilhelmsen Ships Service is part of Wilhelmsen Maritime Services, a Wilh. Wilhelmsengroup company. It has the world's largest maritime services network, with the ability to service 2,400 ports in 125 countries. The company's focus is to ensure that vessels operate smoothly at sea and cut down turnaround time in port. Their customer services provide peace of mind through 24/7 accessibility, personal service and local knowledge.

Wilhelmsen Ships Service supplies maritime products and services, specializing in safety products and services, Unitor products, Gases and refrigeration, Nalfleet marine chemicals, Safety products and services.

Ships Agency, Wilhelmsen Ships Service has re-defined the way ships agents handle port calls. The company has standardized procedures to ensure that customers receive consistent service in all 2,400 ports where they operate around the world. Every customer who enters into a multiple port service agreement is allocated a single point-of-contact, a Global Agent, to oversee and coordinate their global business. This global coordination opens up the possibility to streamlining operations, cash transactions, documentation and communication flows, resulting in improved efficiency and reduced operational and administrative costs.

BRIEF HISTORICAL BACKGROUND OF MYANMAR OIL AND GAS

The country now known as Myanmar, sandwiched in between China and India, two of the world's biggest new sources of energy demand, was one of the world's first oil producer, with some exports as early as 1853. Foreign investment followed, with sizable fields developed in the late 1800s and early 1900s. Myanmar is believed to have significant untapped reserves of natural gas and Myanmar is the largest gas exporter in South-east Asia.

Between 1886 and 1962, the country's oil industry was dominated by Burmah Oil Company (BOC), which discovered the Yenangaung oil field in 1887 and the Chauk oil field in 1902. Both are still in production.

In 1962, the oil and gas industry was nationalized. Until the late 1980s, the government kept foreign operators away. From 1962 to 1988, oil exploration and production were mainly performed by MOGE; foreign operators were kept out by a strict nationalistic policy and the lack of an appropriate legal framework. But beginning in 1988, it liberalized the oil and gas sector to begin allowing outside investment again. Western companies including Total S.A. and Unocal Corporation, later bought by Chevron, entered the market. As in many other countries, the State assumed ownership of the resources, either operating them itself or delegating this task to private operators, who were paid for their outlay and work in oil or gas under Production Sharing Contracts (PSCs).

After a few years, a host of investors from Asia and elsewhere expanded their operations, including CNOOC Ltd. of China and South Korea's Daewoo International. The process intensified after 2004, as Myanmar authorities accelerated the opening of areas for exploration. By 2007, at least 27 companies from 13 countries, including Petronas of Malaysia, PTTEP of Thailand, Total E&P of France and ONGC of India, were active in Myanmar's oil and gas industry.

Although major discoveries of oil have been limited, companies have found sizable deposits of natural gas, which now makes up the bulk of Myanmar's production. Foreign companies are particularly interested in offshore areas along Myanmar's western coast in the Bay of Bengal near Bangladesh, where a consortium including Daewoo has developed a major gas asset that will include a pipeline to China.

The key player of oil and gas policy in Myanmar is the Ministry of Energy (MOE), which has oversight for three state-owned enterprises:

- Myanma Oil and Gas Enterprise (MOGE), formed in 1963, is responsible for oil and gas exploration and production, as well as domestic gas transmission through a 1,200-mile onshore pipeline network.
- Myanma Petrochemical Enterprise (MPE) operates three small refineries, three fertilizer plants and a number of other processing plants.
- Myanma Petroleum Products Enterprise (MPPE) is responsible for retail and wholesale distribution of petroleum products.

Now, The ministry was reformed as Ministry of Electricity and Energy (MOEE) (လျှပ်စစ်နှင့် စွမ်းအင်ဝန်ကြီးဌာန) by the new government in 2016.

In 2007, nine foreign oil companies were permitted in 16 onshore blocks to explore new areas, to enhance recovery from existing fields, to reactivate fields where production had been suspended and to produce oil and gas.

In the offshore, majors companies including Shell, ENI, StatOil, Ophir, BG, Chevron, Total and Woodside are exploring and/or developing in 31 blocks since 2014.

Since late 2004, Myanmar's authorities have intensified the opening of blocks to foreign companies. Myanmar's oil output is small, with gas taking over. The country produces around 180,000 barrels of oil equivalent per day, of which 90% is gas. Credit to Original Authors and Photographers

The background is a vibrant blue gradient, transitioning from a lighter shade at the top to a darker one at the bottom. It is overlaid with several large, semi-transparent circles of varying shades of blue, creating a layered effect. Additionally, there are numerous overlapping, semi-transparent rectangular and trapezoidal shapes, some of which are tilted, scattered across the composition, giving it a dynamic, architectural feel.
